

Concord Overview

Concord at-a-glance

What we do

Concord is the contract management platform. We simplify end-to-end contract management while enhancing compliance and accelerating growth.

How we help you

- Reduce cost and improve revenue
- Gain deeper insights for better forecasting and strategic contract management
- Accelerate growth while maintaining confident compliance with local and global regulations

Advanced security innovations

- Secure, durable, and highly scalable architecture
- Comprehensive audit trail
- Accessible anywhere, secure everywhere

Trusted By 100,000+
Companies in 130 Countries

Successful Contracts.
Faster Processes

Go beyond contract compliance and become a revenue leader

Manual processes are painful and slow, and prevent you from reconciling speed and scale with compliance. And in today's hyper-competitive economy, if you can't grow fast then you'll die slowly.

Concord is the only platform to natively support the entire contract lifecycle—from drafting, to online and in-document negotiation, signature, and managing executed contracts. Concord connects every person, process, and contract in one place, on one single platform, reconciling speed and compliance, enabling accelerated growth, greater scalability, reduced costs, and increased revenue.
